Profile

I am a passionate Software Developer pursuing my B.Tech in Computer Science at Bennett University. Enthusiastic about AI/ML and Web Development, I am always eager to explore and learn new technologies. I have developed multiple projects focusing on mental well-being, fitness, and combating misinformation.

PROJECTS

CYMBOT - Depression-Curing Chatbot

- Designed and built an intuitive user interface that allows users to assess their depression levels through assessment quizzes, receive personalized coping strategies.
- Integrated a chatbot feature that offers friendly conversations to support users' mental well-being.
- Ensured seamless backend integration and user authentication

TECH-STACK - HTML, CSS, Javascript, Python, Llama3.2

ROLE - Frontend Developer

Fit-Aura - Fitness Tracking Website

- Designed a responsive and interactive UI for tracking weight, calories, and exercises.
- Implemented dynamic graphs to visualize calories burned and consumed.
- Developed a personalized dashboard with fitness insights and recommendations.
- Integrated an FAQs chatbot for exercise suggestions and user queries.

TECH STACK - HTML, CSS, FLASK, SQL, JAVASCRIPT

ROLE - Frontend Developer, Database

Fake- News Detector Using AI/ML

- Built a full-stack web platform using React, Node.js & Flask to detect and verify fake news.
- Integrated AI/ML models and Google Fact Check API to generate credibility scores with reasoning.
- Included features like user authentication and a verified news dashboard to enhance media transparency.

TECH STACK - React, TailwindCSS, Node.js

ROLE - Frontend Developer

EDUCON - A Social Media Platform

- Designed and developed a full-stack social media web application specifically for college students to connect with seniors, join clubs, and participate in chapter discussions.
- Implemented Firebase user authentication and club/chapter management using Java Servlets and JSP.

TECH STACK - HTML, CSS, JAVASCRIPT, JAVA, FIREBASE

RootVenture- A startup idea sharing platform

- Developed a full-stack web application that allows users to share, explore, and discuss startup ideas within a collaborative community.
- Implemented authentication with JWT
- Built dynamic frontend components using Tailwind CSS and server-side rendering with Next.js App Router.
- Integrated MongoDB for persistent storage of user profiles, startup ideas, and feedback.

TECH STACK - TailwindCSS, Next.js, MongoDB, Javascript
